## Codebasky Semester Team

### Summary

Active projects: 1

Open tasks: 7

Due this week: 3

### Codebasky MVP

Auth, board, comments, analytics, notifications

### Team

Капарис Андрій - Tech Lead / Frontend

Красногурський Андрій - PO / QA

Богдан - Backend / DevOps

### Next Actions

- Lock stale task updates
- Finish reminders
- Validate manager analytics

Workspace | Board | Analytics

Search tasks by title or description

All | My tasks | Overdue | New task

## To Do

- Finalize workspace role model
- Finalize backup and restore policy

## In Progress

- Implement notification center
- Implement task board filters

## Done

- Add signed URL validation
- Prepare manager dashboard widgets

< Back to Board

# Implement notification center

In Progress | High priority | Owner: Initiator

Implement a robust notification center to alert users about new assignments, mentions in comments, and upcoming due-date reminders. The system should support real-time updates and provide a clear overview of all relevant notifications.

| Due date: | Project: | Linked requirement: |
|---|---|---|
| 2026-05-08 | Codebasky MVP | FR12 |

## Change Log

- Notification list layout approved
- Realtime hook connected
- Need final QA pass

## Comments

**Богдан:** Realtime payload is ready

**Андрій:** Separate mentions from deadlines visually

# Sprint health snapshot

**Done this sprint: 12**

**In progress: 3**

**Overdue: 1**

## Throughput chart

## Risks

- Deadline reminders are not finalized
- Stale updates must be verified
- Keep API contract aligned with backlog

## Overdue focus

Finalize backup and restore policy

Owner: Богдан

Linked requirement: NFR-DOC-06
